### A. PURPOSE

Purpose of the document is as a reference guide to assist:

- I. Surveyors and industry in the lodgment of plans to NSW LRS with reduced errors resulting in lower rates of requisition.
- II. NSW LRS plan examiners in their examination of deposited plans lodged for registration.

Whilst all care has been taken to prepare this Guide, it is acknowledged there may be gaps relevant to the examination of plans. Where this becomes evident by either NSW LRS or surveyors, users of the manual are asked to raise this issue with NSW LRS, who will follow the document change process in section 3 of this Guide.

This *Plans Reference Guide* is a joint initiative between NSW LRS, the Office of the Registrar General (ORG), Surveyor General and Industry.

### B. CONTEXT

Surveyors and Lodging Parties need to consider, and refer to, many primary references in the NSW legislative framework when creating a plan to lodge with NSW LRS. Similarly, NSW LRS Plan Examiners need to reference these same artefacts in the examination and registration of a plan.

This *Reference Guide* pulls together these primary references in a Plan Examination Framework that can be used by both Surveyors and Plan Examiners in the creation, examination and registration of Deposited Plans.

Table 1 below outlines the primary artefacts that are considered in this Reference Guide.

## C. DOCUMENT CONTROL MANAGEMENT PROCESS

NSW LRS will maintain this *Reference Guide* in a controlled manner to ensure that Surveyors and NSW LRS Examiners are working from the same version of the Guide. The document control management process for this guide is outlined below.

All feedback on the Guide should be forwarded to [Plan-requisitions@nswlrs.com.au](mailto:Plan-requisitions@nswlrs.com.au)

Figure 1: Reference Guide Document Control Process

|   |  |  |   |  |  |
|---|--|--|---|--|--|
| • Regulators, Surveyors or NSW LRS identify a gap in the Reference Guide. | • Contact NSW LRS to advise where the inconsistency on the Reference Guide is.       | • NSW LRS will review the inconsistency and propose an amendment to the NSW LRS General Manager (GM) TPS.  | • The Reference Guide is updated to the next version.<br>• Any NSW LRS supporting materials are also updated. | • NSW LRS emails Surveyors, Industry Groups (ISNSW, ACS, CSA) and regulators to advise of update, how to access and when it will become effective. | • One month after being published on the NSW LRS website, the change becomes effective and will be used by NSW LRS Examiners in their review of submitted plans. |
| • Regulators introduce a new regulatory practice.                         | • NSW LRS will respond to acknowledge it has received your advice and will consider. | • NSW LRS GM TPS to consider and decide on update.<br>• If it is decided not to include change, feedback on the reasons is to be provided to the submitting party. |   | • NSW LRS to present on changes to Industry Groups.  | • The previous version of the Guide is removed from the NSW LRS website  |

### i. Identify Changed Requirement

Regulators, Surveyors or NSW LRS may identify a gap or error in the *Reference Guide* or alternatively Regulators may introduce a new regulatory practice.

It is important to note that this Reference Guide should be useable and useful for all parties. If an improvement will make the Guide more usable, then all parties are encouraged to submit a change request.

### ii. Request a Change

If a party requests a change for the Reference Guide, that party owns the actual request and needs to explain the reason for the change and ensure all impacted areas have been identified and included in the review and approval of the change. When defining the change, it is necessary to have the request in hand with all supporting statements. This should at a minimum include the following:

- clearly and concisely outlining what needs to be changed, so NSW LRS can review and analyse.
- provide the reason for the Change Request, including detailing the rationale for, and overall business or customer impact of, the change requested.

All feedback on the Guide should be forwarded to Plan-requisitions@nswlrs.com.au

### **iii. Review Proposed Change, Consult + Approval**

Once NSW LRS receives the change request from any party (Requestor), they will:

- acknowledge receipt of the request and provide a timeframe of when the Requestor can expect to hear back from them with an outcome.
- review the request and, where necessary, consult with Legal and the Regulators on issues of ambiguity.
- prepare a recommendation to the Titling and Plan Services Managers on the request and the proposed change.
- General Manager of Titling and Plan Services to make decision on the change.

NSW LRS will respond to the Requestor with the outcome and reasons and if the Reference Guide is to be amended, when the next version is to be issued. It should be noted that NSW LRS may accrue a number of changes prior to releasing the next version.

### **iv. Change the Document**

Once approved, the change will be made to the *Reference Guide* and the Version control table will be updated. The Publication Date and the new Effective Date will be outlined on the front page.

Any NSW LRS supporting materials will also be updated.

### **v. Communicate the Change**

NSW LRS will advise Regulators, Industry Groups (ISNSW, ACS, CSA) and individual Surveyors of the updated version and:

- what has changed and why
- when this *Reference Guide* will become effective (i.e. when NSW LRS examiners will start using it). Please note this will be at least one month from the Publication Date (in the NSW LRS Website)
- any information sessions that are being run.

NSW LRS will seek to present on the updates to any Industry Group that is interested in hosting a presentation.

### **vi. Effect the Change**

One month after being published on the NSW LRS website, the new Reference Guide will become effective and will be used by NSW LRS Examiners in their review of submitted plans.

The previous version of the Guide will be removed from the NSW LRS website
